

Posture analysis

Because your body is different to others, your exercise must be different to others.

To find out the best and proper exercise for you, your posture / body pattern will be analysed at our clinic.

We use real-time video feedback for you to understand your movement pattern for your recovery.

Learn how your body works and start your personalised exercise program.

Dry needling coupled with joint treatment.

When dry needling is performed properly with combination of joint treatment - you obtain rapid improvement and the pain can be reduced significantly.

We aim to reduce muscle tension dramatically through combined treatments of dry needling and joint mobilisation treatment.

Fees

Initial Consultation (\$83)

Initial consultation takes up to 40 mins depending on your condition.

The Initial session consists of interview / assessment / treatment / exercise prescription.

Follow up consultation (\$73)

Follow up consultation takes up to 30mins.

The follow up sessions include Re-assessment / treatment / review and progression of exercise program.

Workcover/TAC (motor vehicle accident claim)

Receive your physiotherapy treatments under workcover/TAC claim.

The fees for consultation and treatment are reasonably priced.
